<td>Exit the ImageViewer.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

* Pressing a key by itself applies the command to the primary display. Pressing a key while holding SHIFT or CTRL applies the command to the secondary display (SHIFT) or to both displays (CTRL). In split mode, the primary display is the top or left display and the secondary display is the bottom or right display. In normal (“un-split”) mode, there is only one display: the primary display (in this case, SHIFT and CTRL are ignored).

Mouse Shortcuts*

<table>
<thead>
<tr>
<th>Icon</th>
